

**UNITY FOILS**  
PURSUIT FOR PACKAGING

We have  
**ideas**  
for better packaging

# Introduction of Company

Unity foils is a new expansion venture by old doyens in the packaging industry. With history & reputation, Unity foil is a packaging company with pan India presence serving multitude of industries since decades.

Foil based packaging is extremely valuable in the business of packaging. Unity Foils is an endeavour to craft your packaging brand to next level across the world.

Our philosophy is to promote your products to consumers through adoption of resource & modern technology.

We take strict steps providing consistent quality to earn our customer's trust & retain it by developing long term relationship.

## Infrastructure

Our investments in infrastructure, both for location & machineries chains up our access to customers, suppliers & all our associates. Our setup is having fundamental facilities & systems support our functionality.

### We are facilitated with:

- 12000 Sq Ft at Bhiwandi, Thane, Maharashtra
- Dust & insect free atmosphere
- Heavy duty pallet trucks
- Hydraulic roll lifters
- Cage hoist & scissor lift for minimum manpower usage
- Fire-fighting systems with smoke detectors & water sprinklers
- CCTV cameras all over
- Safety signs & systematic illumination

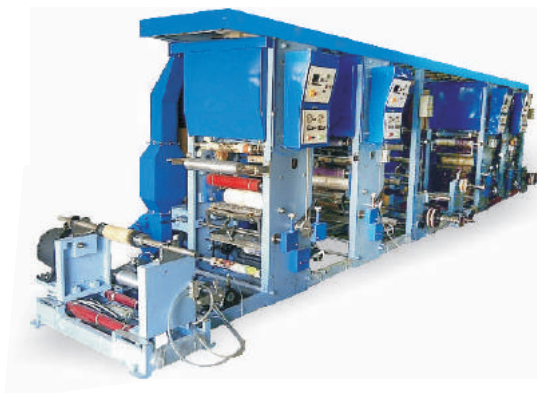

**The cGMP standard facility equipped with AHU system of general clean class having three stage air filtration process is in place.**

# Machinery

- Heavy duty Slitting machine of 1000 mm width.
- Automatic 6 colour gravure printing machine 600 mm width with (4 + 2) partition for optimum utilization of machines through different combination. Two station reverse printing facility for both side register printed jobs.
- Automatic 6 colour gravure printing machine 450 mm width with (4 + 2) partition for optimum utilization of machines through different combination. Two station reverse printing facility for both side register printed jobs.
- Heavy duty automatic inspection doctoring machine with load cell base pneumatics to ensure defect free end roll delivery.

## Forthcoming Machines

- 100% inspection system
- Digital Printing Machine

## Research | Development | Innovation

R & D is the process intended to create improved & advanced technology that can provide competitive advantage to our customers. We have established our R & D team who keeps exploring new ideas & innovations from time to time. This allows us to share all facets of packaging material with our esteemed clients making it innovative as well as cost effective.

R & D isn't just about creating new products, but it can be used to strengthen an existing product with additional features. While the process of technological innovation is complex & expensive, the rewards can be high.

With modern anti counterfeit designs, environment friendly inks & lacquer, we fulfil our CSR.

## Quality Control

Essentially, QC is the most important aspect for delivering end products to meet customers' expectations. It is the basis of operative business that minimizes wastage & works at high level productivity. Our quality policy is documented which helps our business to avoid any harm to our customers' products & eventually customers' reputation.

We know that quality matters & we keep improving it for our clients.
